## **CO-OPERATION ON PLANT HEALTH**

3. Ministers noted the progress made by the Departments on the development of a work programme for a joint strategic approach to plant health and pesticides and looked forward to the work programme being presented to a meeting of the NSMC in Agriculture sectoral format in early 2011. They also noted the ongoing co-operation between the Departments in dealing with a number of outbreaks of *Phytophthora ramorum* in Japanese larch forests. There have been seven confirmed outbreak sites spread across counties Antrim and Down and four confirmed outbreak sites in counties Tipperary, Kilkenny and Cork. Ground and aerial surveys continue to be carried out to determine the distribution of this disease. At the commencement of the outbreaks, the relevant Contingency Plans were applied in both jurisdictions and there is significant ongoing co-operation between the Agriculture Departments on the issue.

## **CAP AND INTERNATIONAL TRADE ISSUES**

4. The Council noted the upcoming publication by the European Commission of its communication on the future of the CAP.

In late 2009 the dairy market improved and returns have now stabilised.

- the high level of interest in the funding of €10m available from the Rural Development element of the INTERREG IVA Programme to address rural disadvantage / deprivation through strategic cross-border actions within the eligible area of Northern Ireland, the border counties of Ireland and Western Scotland and that it is expected that funding awards will be made later in 2010; and
